

Planning and Design Committee Update—December 13, 2009

The Planning and Design Committee met for the first time on November 24. As I wrote in the November 15 bulletin, this committee is responsible for articulating our needs and vision to an architect who will in turn develop schematic drawings and provide estimated costs for any renovation or construction that we will do in our parish. At the meeting, the members were introduced to the theme chosen by the Pastoral Council for this parish undertaking: “Making Room at Our Table.”
